

## **Southern Insurance Underwriters, Inc. Goes Live with I-Engineering's Policy Underwriting & Management for Agents Access, PUMAA System**

An Underwriting and Policy Management System with Agent Access Launched  
by an Elite MGA in the Southeast

**Shelton, CT, April 8, 2022** – I-Engineering, Inc. is pleased to announce the launch of the PUMAA System with Southern Insurance Underwriters, Inc., a premier specialty wholesaler serving the Southeast markets. SIU offers a broad range of products and markets to more than 2,500 independent insurance agents in Alabama, Florida, Georgia, North Carolina, South Carolina, Tennessee and Virginia. Now utilizing the power and efficiency of I-Engineering's PUMAA, a powerful cloud-based point-of-sale underwriting platform, SIU has the speed to serve their business partners with the highest level of service and attention to detail.

PUMAA's design allows for underwriters to fully process and manage quotes and policies, seamless communication and document exchange between underwriters and retailers, and automation of customized underwriting rules. While PUMAA is a standalone system, it can be integrated into a current management or billing system through API.

Tripp Duesenberg, President of SIU, said, "For more than 55 years, SIU has been serving independent agents throughout the Southeast. We are thrilled to incorporate PUMAA's automated underwriting platform in conjunction with our current ALIS system to better service our Commercial Property & Casualty business."

"The PUMAA system, with its agent access capabilities, will streamline business and communication between SIU underwriters and our retailers," Duesenberg said. "The API integration with our current ALIS system is an added bonus that ensures our full business processes have no interruptions."

Naval Kapoor, President and CEO of I-Engineering said, "We are gratified to have Southern Insurance Underwriters using the PUMAA system as their all-encompassing technology platform. Our priority is serving our client-partners with premier service, while providing them a comprehensive and intuitive management system to drive efficiency and productivity. We appreciate the opportunity to work with SIU to bring them a system that meets their needs today and will continue to grow with them in the future."

**About Southern Insurance Underwriters, Inc.**

Southern Insurance Underwriters (SIU) was established in 1964 as a Georgia corporation. Since that time SIU has grown to become one of the largest family owned MGAs in the country. SIU has a broad range of products and specializes in hard to place, specialty and excess & surplus lines risks. With an experienced staff of seasoned underwriters, the scope of risks that can be underwritten ranges from the most simple property risks to highly sophisticated self-insured programs.
